1. The following is an examiner's statement of reasons for allowance:
2. Regarding claims 1 and 7, Yasumoto teach a sealed condition inspection device and method which uses a support for holding an element to be inspected and places a pair of electrodes in opposing relation to one another with a sealed portion of the element in between the electrodes. Yasumoto fail to teach or suggest using opposing electrodes on opposite sides of the sealed portion which are oppositely charged. This limitation in combination with the other limitations of the independent claims renders them allowable.
